

Cisco Small/Medium Business Solutions

Saudi Fanks Brings You a World of Cutting-Edge Enterprise Solutions Featuring Cisco Technology and Cisco-Certified Implementation Expertise providing networking, communications, wireless, security, routing and switching products and solutions all designed on platforms specific for small and medium-sized businesses.

Explore Key Integrated Technologies

Unified Communications / Voice:

Bringing it all together, combining your company's voice and data systems through unified communications.

- **Cisco Unified Communications Manager (Call Manager)** — Cisco Unified Communications Manager is an enterprise-class IP telephony call-processing system that provides traditional telephony features as well as mobility, presence, and conferencing services.
- **Unity** — Manage voice messages by email, web clients, mobile devices, instant messaging, and desktop clients with Cisco Unity connection.
- **UCCE** — Cisco Unified Contact Center Enterprise delivers intelligent contact routing, call treatment, network-to-desktop computer telephony integration (CTI), and multichannel contact management over an IP infrastructure.

Networks:

Saudi Fanks can provide certified Cisco engineers experienced in survey, design, installation, troubleshooting, assessment and ongoing support of all aspects of Cisco networking including wired, wireless, routing and switching.

- **Routing** — Combine your Internet access, security, and wireless services onto a single secure device that keeps your employees connected to the resources they need to stay productive.
- **Switching** — Cisco switches deliver high performance, secure, scalable solutions to meet the needs of small businesses, multi-site enterprises, data centers, or service providers.
- **Assessments** — A proactive approach to potential points of attack through an evaluation of the health of your IT infrastructure with a professional network assessment to identify vulnerabilities within your network architecture.

Wireless:

Saudi Fanks can also provide certified Cisco engineers experienced in survey, design, installation, troubleshooting, and ongoing support of all aspects of indoor and outdoor Cisco wireless networks.

- **Surveys** — A thorough analysis of a network is essential in preparation of software, application and equipment upgrades and deployments. Datanamics surveys can include testing signal strength, noise, signal to noise ratio, channel interference and spectrum analysis.
- **WLAN or Access Points** — Simplify your working environment by combining the mobility of wireless with the performance of wired networks.
- **Controllers** — Support small or large wireless network deployments with flexible standalone or integrated controllers and controller modules.
- **Training** — To achieve maximum IT efficiency within any size organization training is key. Our Cisco certified training programs and courses meet the needs of Cisco professionals, partners, and IT staff.
